Education

Trinity International College **April 2022 to April 2026**
Bachelor of Science in Computer Science and Information Technology *Dillibazar, Kathmandu*

- **Relevant Coursework:** Object Oriented Programming, Software Engineering, Database Management Systems, Web Technology

Skills

Languages: C#, SQL, JavaScript, TypeScript, HTML, CSS
Frameworks and Platforms: .NET Core, ASP.NET Core Web API, Entity Framework Core, React, Next.js, Tailwind CSS
Databases: MySQL
Tools and Practices: Git, GitHub, GitHub Actions (CI), Docker, RESTful APIs, JWT Authentication, Unit Testing, Object Oriented Programming, Debugging

Experience

ASAP Digital By Easysewa Pvt. Ltd. **Dec. 2025 to June 2026**
Frontend Developer Intern *Baluwatar, Kathmandu*

- Built the frontend for a restaurant online table reservation system using Next.js, translating UI/UX designs into a functional booking flow
- Developed reservation pages using HTML, CSS, JavaScript, Next.js 14 App Router and React Server Components
- Integrated RESTful APIs and applied responsive design patterns, ensuring functionality across mobile and desktop
- Worked with a team using Git and GitHub, following coding best practices while fixing bugs and delivering new features

Projects

Calmref | *C#, ASP.NET Core Web API, EF Core, MySQL, React, TypeScript, GitHub Actions* **GitHub**

- Built a full stack rich text snippet sharing app where anyone can create, open, and edit clips through public slug based URLs, using React 19, TypeScript, Vite, and the Quill editor
- Designed a secure authentication flow in ASP.NET Core with email registration and OTP verification (MailKit), JWT bearer authentication, and refresh tokens for persistent sessions
- Modeled clip ownership, read only locking, and per clip editor history with Entity Framework Core and MySQL; added inline image uploads through ImageKit.io with rate limited upload authentication
- Wrote unit tests for backend services and set up a GitHub Actions CI workflow to automatically build and test every change

Image Tinker | *TypeScript, HTML5 Canvas, React, Zustand* **Live Demo**

- Developed a browser based image editor on HTML5 Canvas with React and TypeScript, supporting layers, shapes, freehand drawing, and text elements
- Applied object oriented design by implementing a Command pattern store for reversible canvas operations, enabling full undo and redo history
- Implemented layered editing with reorder, blend modes, and opacity controls

Involvement

Juniper Dev's Game Jam | *Godot, GDScript* **June 2026**

- Collaborated with a teammate to design, build, and ship a complete 2D platformer within a 7 day online game jam
- Implemented gameplay mechanics and logic in GDScript, and created original game assets and music
- Practiced working under a hard deadline while coordinating tasks and integrating work with a teammate
